

# Use New Display Options and Add Emojis!

The compressed menu on the left (1) now shows you which activity you are on, and (2) allows you to collapse the right panel to utilise the full width of the screen on desktops and tablets.

## Vary Displays of Learning Content

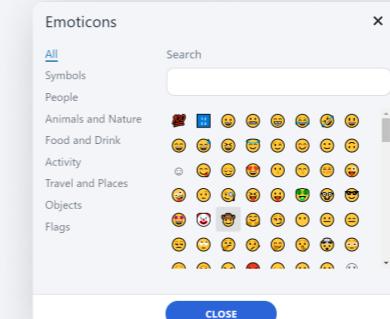

- Support for Content Display

Display content side-by-side (e.g image in one column and a question in the next column beside it).

Alternatively, use the accordion display to minimise content shown on the screen.

## Add Emojis

- Express Yourself!
- Click on the 'Emoji' icon and select from a wide range of emojis.

## QUESTIONS ABOUT USING SLS?
